

Instructions for Online Demo of Teachers

1. Preparation:

- Familiarize yourself with the online platform or software you'll be using for the demo.
- Prepare your lesson materials, including slides, videos, or interactive resources on the topic given.
- Test your equipment (microphone, webcam, internet connection) to ensure everything is working properly.
- Set up your teaching environment in a quiet, well-lit space with minimal distractions.

2. Time duration

- Minimum 10 Minutes and maximum 15 Minutes

3. Introduction:

- Start the demo by introducing yourself, class, topic and setting the context
- Provide an overview of what you'll be covering during the demo.
- Establish guidelines or scope of engagement.

4. Demonstration of Teaching Skills:

- Demonstrate effective teaching strategies, such as scaffolding, differentiation, or formative assessment techniques.
- Provide clear explanations and examples to illustrate key concepts.
- Model positive communication and classroom management techniques.
- Incorporate multimedia elements to enhance engagement, such as videos, images, or interactive whiteboard tools.

5. Clear Communication:

- Speak clearly and at a moderate pace to ensure that audience will understand you.
- Use visual aids and gestures to support your verbal instructions.

6. Record Your Demo:

- Use screen recording software to capture your online demo session. Ensure that your recording settings are optimized for quality and clarity.
- Practice your demo beforehand to ensure smooth delivery and minimize errors.
- Consider scripting or outlining your presentation to stay on track during the recording.

7. Edit (if necessary) and upload Your Recording

- Edit your recording to remove any unnecessary pauses, mistakes, or technical issues.
- Sign in to the open platform (YouTube/ google drive) where you will be submitting your demo.
- Follow the platform's instructions for uploading videos or content. This may involve creating a new post, uploading a video file, or adding a link to your recording.
- Tag your demo with relevant keywords or categories to make it easier for users to find.
- Preview your demo before publishing to ensure everything looks and sounds as intended.
- Double-check that your demo is set to the appropriate privacy settings for sharing
- Once your demo is published, share the link with your intended audience.
